

13 MAR 1967

MEMORANDUM FOR: Director of Computer Services

SUBJECT : Transfer of Responsibility for the Personnel
Locator File

REFERENCE : Memo dtd 10 Feb 67 to Ex Dir-Compt. fr D/CS,
same subject

1. We concur in principle in the recommendation made in your memorandum. Though the maintenance of a Locator System is a service of common concern which could be performed in any one of several places, it most logically should be done in Personnel. We envisage the development of an internal monitoring system by use of personnel actions in addition to the updating which should be generated by the individual employee or the component to which he is assigned.

2. There is now in a late stage of development a greatly improved and refined Locator System as part of the Management Information System being developed by the Support Services Staff (group). The transfer you propose in your memorandum should be coincident with the inauguration of that new System. We, therefore, non-concur in your proposal at this time.

Deputy Director of Personnel
